1 Introduction

How do you include a section in LaTeX? LaTeX Sections — NASA-LaTeX-Docs documentation Sections in LaTeX are generated using the following commands that are defined in the native article document class: Level 1: nikhil Level 2: karan Level 3: amna Level 4: arjun Level 5: price

2 randomly

blue Make sure to ask lots of follow up questions **related to their answers**. **But remember** it's a conversation, not an interrogation. So when they ask you a question, make sure to give a long detailed answer *and answer any follow up* questions they ask you. Every conversation should be a give and take of talking and listening. Don't discuss religion and politics until you get to know someone. There are no religion or politics topics on this list and that is because you probably shouldn't discuss these topics unless you want to get into an argument with the person or make the person uncomfortable. Seriously, just don't.

3 hoe to write mathematical equation

3.1 how to inset a equation within a line

There are some people who might just not feel like talking. Remember, if someone gives you a lot of one word answers, doesn't make eye contact, and doesn't ask you any questions; that probably means they aren't in the mood for a conversation. In that case it's better to just end the conversation and leave them to their own thoughts. $H_0 : x^{(2)} + 2x + 1$

3.2 how to insert equation separately

Keep the majority questions open-ended. This will make it more likely to get answers that have a lot of detail so that you can ask follow up questions. If most of your questions are closed-ended you'll end up getting lots of yes, no, and one word answers.

3.2.1 uncle ji pani pila dijiye

$$\sigma = x^{(7)} + 2\sigma + \epsilon content...$$

$$x = \frac{x(3) + 2x + 1}{x^3 + 2x + 1}$$
